

Development activities can be divided into two groups:

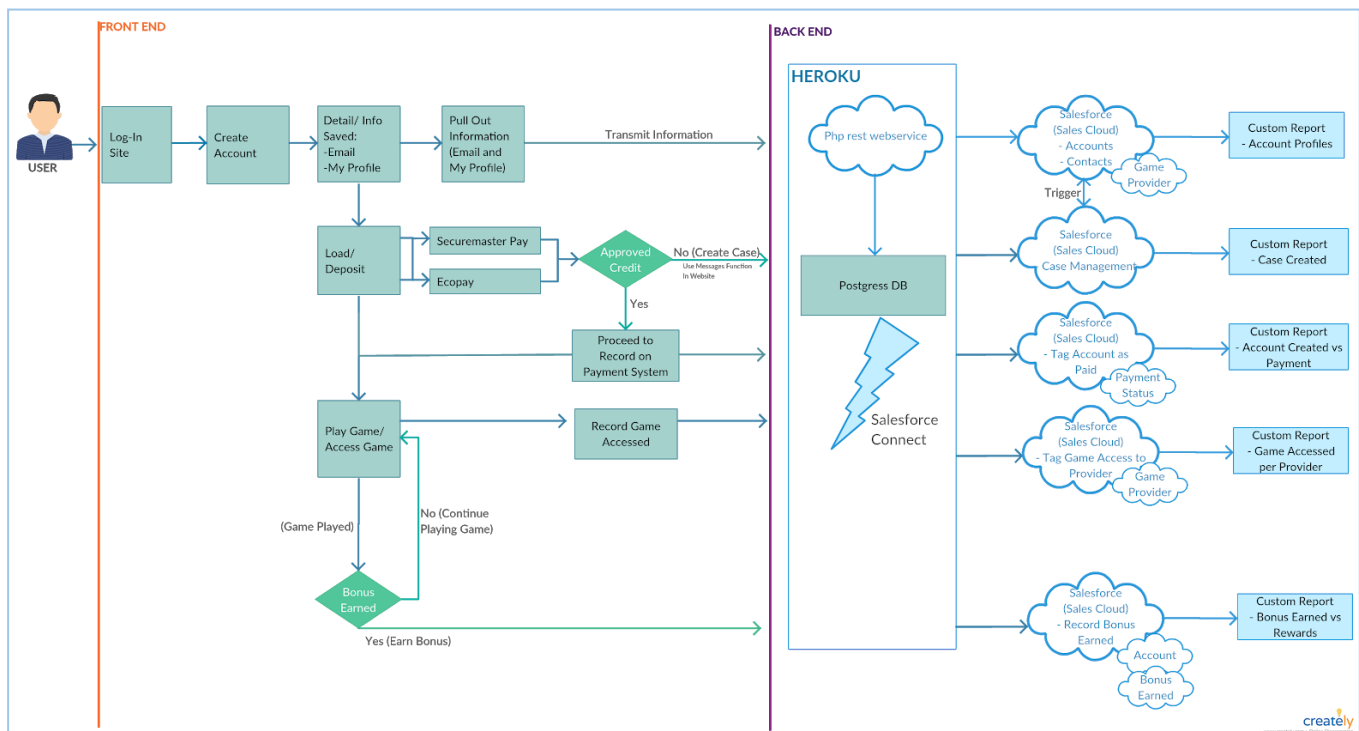

- Configuration of the system; and
- User set-up.

Included here is the Unit testing done by _____.

Once the system is configured, a validation session will be held with SportsnGaming to verify the system.

2.6.3.1 Scope of Development

See below the architectural diagram for this project effort:

- At the front end, the customer has to code their site to call the Php rest webservice. The programming language that will be used is Json.
- Meanwhile, at the back end. __ will configure the Salesforce Heroku and Sales Cloud platform, this will address the following:
 - This will manage game players
 - Case management (payment process)
 - Connect them to game providers
 - Email the gamers
 - Generate reports
